

Job Title: Engineer/Scientist (job title is flexible)

Location: Cambridge, MA

Company Description

Cognito Therapeutics, Inc. is a venture backed (Morningside Ventures) startup company translating scientific findings from MIT into therapeutic approaches for Alzheimer's disease and other neurodegenerative conditions. We are a fast moving, highly motivated and caring team of people with the ambitious goal of helping the millions of Alzheimer's disease patients and caregivers around the world. With our patented stimulation technology, we are committed to developing non-invasive device-based therapies.

Job Summary

We are looking to grow our team of scientists and medical device innovators who want to make a difference and improve people's lives on an everyday basis. You will apply your knowledge to the analysis of large, diverse data sets coming from our clinical and translational research studies. You will help us to develop our therapies and improve patient lives. Positions are available at junior and senior levels.

Required Qualifications

- Expertise in data analysis, signal processing, machine learning, statistics
- Sound programming skills using data analyses languages (e.g. MATLAB, Python etc.)

Desired Qualifications

- Enthusiasm in doing research and interest in improving patient lives
- Willingness to develop and learn new methodologies as needed
- Strong analytical and problem-solving skills
- Excellent communication skills
- Highly organized and detail oriented
- Thrives in fast-paced environment
